

PRESS RELEASE

EDEN BIODESIGN RESTRUCTURES ITS EXECUTIVE MANAGEMENT TEAM

Liverpool, UK; 20th November 2007: Eden Biodesign Ltd, an expert provider of development and manufacturing services for new biopharmaceutical medicines, today announced a management restructure which will result in changes to responsibilities for three members of its executive management team.

Dr Derek Ellison (Co-Founder of Eden and previously Business Development Director) will take up the role of VP Development and Manufacturing. Derek will be responsible for ensuring successful and timely delivery of client projects and will manage both the development and cGMP production departments.

Derek Ellison comments “Over the past year Eden has firmly established itself as a leading Contract Manufacturing and Development Services Organisation. The business has enjoyed considerable commercial success, having been able to publicly disclose nine new client contracts and doubling the number of staff to over 60. This restructuring is aimed at enhancing the company’s ability to successfully deliver a high volume of complex client projects”.

Dr Anita Bate, (Co-Founder of Eden) retains the title of Science Director but her role expands to lead the Consultancy and Technical Services group, which encompasses client project management.

Dr Roger Lias, President Eden Biodesign, Inc who joined Eden earlier this month will assume responsibility for Global Business Development. Roger’s responsibilities will include identifying and establishing strategic business partnerships and expanding Eden Biodesign's offer to the large North American biopharmaceutical sector. In addition, Roger’s responsibility will be to manage Eden’s continued strong growth in Europe and Asian markets.

Crawford Brown, CEO added “The changes made will enable us to streamline design of proposals, product development and cGMP delivery and to ensure that the US operations are both integrated into the heart of the business for the benefit of current and new clients”.
